

SEMICON®
Europa2010

Dresden, Germany
19-21 October

Reward yourself with Smart Test Solutions

Q-Star Test / **HTT** is inviting you to visit Semicon Europa 2010 and learn about the **solutions for (test) cost reduction combined with product quality improvement** we are offering. We are welcoming you at **HTT's** booth (booth 1.634) at the Semicon Europa event in Dresden.

We also invite you to come and listen to the presentation on "**IC Yield, Reliability and Prognostics using Nanoscale test Structures**" which will be given by **Q-Star's CEO Hans Manhaeve** on Thursday October 21st 2010 during session 3 of the 12th European Manufacturing Test Conference (EMTC).

If you are a decision maker, manager, product engineer, designer or test engineer, then you can benefit from our solutions. In cooperation we offer a total package solution consisting of test program optimization, test program engineering & conversion, IDDX/ISSX application support and electronic health monitoring. We assist you in achieving the required test coverage and lowering your test costs based on our unique high performance supply/ground current test solutions. We offer you the right solution to assure quality and reliability of your products and to test your high performance DSM and Nanoscale ICs as well as your low power semiconductor devices.

Discover the rewards of our Solutions:

- Up to **10x** test time reduction without test quality loss
- Supporting **Oppb** quality & reliability requirements
- Fast & accurate Failure Analysis

We are looking forward to meeting you in Dresden. Contact Hermann Horn of **HTT** (hhorn@httgmbh.de) or contact us at events@qstar.be to schedule a meeting and remember: "Real *surprises* await those who choose wisely".

Q-Star Test is a leading supplier of innovative solutions for test cost reduction and product quality improvement, offers best in class intelligent IDDX and ISSX measurement equipment, DFT and Test consulting and engineering services, Electronic health management and Prognostic solutions, as well as electronic and PCB engineering services for the development of prototypes and small series productions.

HTT - High Tech Trade -- is the leading European organization supporting the customers in the semiconductor industry, photovoltaic, nanotechnology, medical, pharma, aerospace and plastic industry. HTT offers pre- and after sales support, maintenance and application.

Let Q-Star be your Test Star.
